

SDA2-4.8

Application

Fastening of timber batten to aluminium profile

Component 1 (t _I)		Component 2 (t _{II})	
Timber	20–40	Aluminium	1.8–2.2

Fastener material

Austenitic stainless steel A2

Approvals

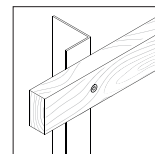

—

Features and Benefits

- Self drilling fastener suitable for installation of timber battens onto aluminium structure
- Variable application range given by large clamping range
- Low insertion torque during installation given by adjusted clamping range
- Flush-mounted installation without damaging the timber surface given by the milling grooves

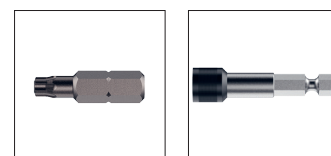

Documentation

Technical Data

Fastener in A2 onto aluminium
